

PATRONS

Dr. Sanjay Chhibber, President,
*Department of Microbiology,
Punjab University, Punjab*

DR. C.S. Vinod Kumar, Vice President *Department of Microbiology
S.S. Institute of Medical Sciences
and Research Centre, Karnataka*

Secretary:
Dr. Gopal Nath
*Department of Microbiology,
Institute of Medical Sciences,
Banaras Hindu University, Varanasi*

Joint Secretary:
Dr. Amita Gupta,
*Department of Biochemistry,
University of Delhi, South Campus,
New Delhi*

Treasurer
Dr. Deepak Kumar
*Department of Microbiology,
Institute of Medical Sciences,
Banaras Hindu University, Varanasi*

Executive members:-

Dr. C.P. Mishra
*Department of Community
Medicine, Institute of Medical
Sciences, Banaras Hindu University,
Varanasi*

Dr. B.N. Tripathi ,
*National Research Centre on
Equines Sirsa Road, Hisar*

Dr. Rama Chaudhry
*Department of Microbiology, All
Institute of Medical Sciences,
Ansari Nagar, New Delhi*

Dr. Anil K Gulati
*Department of Microbiology,
Institute of Medical Sciences,
Banaras Hindu University, Varanasi*

Dr. Sanjay Mehta
*Galaxy Hospital, 4, Dayal Enclave,
Mahmoorganj Rd, Mahmoorganj,
Varanasi*

The Indian 'Society for Bacteriophage Research and Therapy (SBRT) is a platform for phage researchers to share their expertise & resources. The diverse aspects of phage research and therapy in India include clinical application of phages as antibacterial agents, in diagnostics, drug delivery, cancer therapy and water & sewage treatment, animal husbandry, poultry, food safety, aquaculture and in agriculture. As the world is realising the potential of bacteriophages, the importance of organizing workshops to teach phage isolation, especially in Africa and Asia where infectious diseases are more prevalent can be much appreciated.

SBRT is pleased to announce a webinar on **"Phage Directory: Making the world's phages accessible, manageable and shareable"** by **Dr. Jessica Sacher** and **Mr. Jan Zheng**, founders of **Phage Directory, USA**. The directory was created in 2017 with an aim to develop the technological infrastructure to support an ever-expanding global collection of well-characterized phages curated by phage researchers. Mission of this independent, two dynamic-persons organization is to assist in phage therapy and biocontrol by empowering the global phage community to access, use and build upon the world's phage knowledge.

Please join us on **03 September (Thursday), 2020 at 8.30 pm IST/11 am EDT**. We look forward to your participation. Register here <https://rb.gy/vyfukn>
